

LOCALISM

As the effects of Council cuts begin to bite; the Parish Council is worried that these cuts will affect the least advantaged in society more than they affect other people. We think this might be an opportunity to introduce a **'good neighbour project'** in Witcham so that we can look after those in the community that need it most.

One idea we have had had is to develop a network of good neighbours who will undertake to give a small amount of time for the benefit of us all. Helping to reduce crime and antisocial behaviour, and encouraging neighbourliness.

We think these people will be able to act as a link between the community and the health and social services and the Community Police through neighbourhood watch.

If you are interested in helping to maintain a high level of community spirit in our parish
